

Yorskip – a new brand in the market.

The recent expansion of Yorwaste's skip operations into Catterick, Richmond and Northallerton areas, coupled with recent acquisitions on the east coast, has led to the decision to create one umbrella brand – Yorskip. Radiating from our York base, Yorskip now offers a comprehensive coverage of North Yorkshire and is set to gain a greater share of the lucrative north east region.

This domination will help to secure waste streams and generate recyclates. To support this expansion, a new telephone system has been installed with a dedicated number **(0800 300 8889)** to provide a central resource for enquiries and follow up. Green partnerships in the construction industry construction companies require increasingly sophisticated environmental performance indicators and site waste management plans. Yorwaste's 'trace your waste' recycling and recovery certification programmes are leading the way in providing green solutions in this industrial sector. The audit trail of waste material generated on construction sites is now monitored to state clearly the amounts of waste recovered and recycled. In addition, a new dedicated plasterboard recycling service has been introduced in collaboration with Knauf Plasterboard, one of the largest manufacturers of the material.

In response to this demand, more dedicated recycling facilities for construction and demolition materials are planned at other sites across the region.
