Introductory note

This introductory note does not form a part of the permit

The following notice, which is issued pursuant to regulation 20 and Part 1 of Schedule 5 of The Environmental Permitting (England and Wales) Regulations S.I.2007 No. 3538 (the Regulations), gives notice of the variation of an environmental permit to operate a regulated facility.

The main features of the facility are as follows. To operate a Hazardous Waste Transfer Station with waste treatment and storage at the specified location. Apart from asbestos and waste oils destined for disposal, the majority of hazardous waste will be bulked up for recovery at other permitted facilities. Where possible wastes of similar types will be transferred into larger containers and sent to other facilities for further treatment, recovery or disposal. Non-hazardous wastes can be bulked up for disposal or recovery elsewhere and also can be treated by sorting, separation, screening, baling, shredding, crushing and compaction of waste. This permit does not permit the burning of any wastes, either in the open, inside buildings or in any form of incinerator.

This variation will correct the administrative errors on the waste management licence (now an Environmental Permit), include changes to the waste types accepted and update the permit to the new Permit Template.

Schedule 1 of this notice lists any deleted conditions, Schedule 2 lists any amended conditions and Schedule 3 lists any conditions that have been added.

The status log of the permit sets out the permitting history, including any changes to the permit reference number.
