

# Cardboard Core

The below specification details the wastes that are acceptable, and those not acceptable in the Cardboard Cores specification:

## YES

- ✓ Cardboard Cores
- ✓ Moisture (less than 10%)

Cores are not cardboard (Old Container Cardboard or Kraft Lined Straw) and are made up from a lower grade of card with less wet strength which is traditionally more similar to scan board.

## NO

- ✗ Contents wound onto the cores
- ✗ Plastic strapping
- ✗ Plastic cores
- ✗ Moisture (more than 10%)

## STRICTLY FORBIDDEN (PROHIBITIVES)

Should **NOT** contain wastes listed in the National Catalogue of Hazardous Wastes, as there is a **0% tolerance**. This includes the following (although this list is not exhaustive):

- ✗ Food waste
- ✗ Garden waste
- ✗ Medical, hygiene and pharmaceutical waste
- ✗ Hazardous waste (paint, chemicals, oil, asbestos)
- ✗ Nappies
- ✗ Concrete, soil, stone and brick
- ✗ Bitumen
- ✗ Electrical equipment, wire or batteries
- ✗ Burnt or partially burnt paper
- ✗ Corrosive, toxic or flammable material
- ✗ Wood
- ✗ Wallpaper
- ✗ Magnetic tape or photosensitive material (e.g. x-ray film, video tape)

## NO RADIOACTIVE MATERIAL, EXPLOSIVE WEAPONS OR AMMUNITION IS ALLOWED

Yorwaste guarantee to recycle 100% of acceptable material received. The only exception to this will be any material that does not meet our specification. This may be sent to energy from waste and will be charged if it cannot be placed into another more suitable grade.

Downgrade from Cores to general waste if not meeting Cores Specification. If contamination is more than 5% details to be noted on weighbridge transaction.
