

# Poly Prop Plastic

The below specification details the wastes that are acceptable, and those not acceptable in the Poly Prop specification:

## YES

- ✓ Dumpy bags
- ✓ Woven poly prop materials traditionally from construction sources

**GRADE A** Clean dumpy bags, PE liners removed all white

**GRADE B** Few coloured bags (less than 2%) and not as bright as grade A, examples dumpy bags that have previously contained sand or aggregates (construction).

**GRADE C** Bags – majority coloured rather than white. If evidence of non-conforming items found – speak to manager before accepting.

## NO

- ✗ Metal clips
- ✗ Trapped content within bags
- ✗ Film plastic (PE) liners within the bags
- ✗ Poly prop strapping

## STRICTLY FORBIDDEN (PROHIBITIVES)

Should **NOT** contain wastes listed in the National Catalogue of Hazardous Wastes, as there is a **0% tolerance**. This includes the following (although this list is not exhaustive):

- ✗ Food waste
- ✗ Garden waste
- ✗ Medical, hygiene and pharmaceutical waste
- ✗ Hazardous waste (paint, chemicals, oil, asbestos)
- ✗ Nappies
- ✗ Concrete, soil, stone and brick
- ✗ Bitumen
- ✗ Electrical equipment, wire or batteries
- ✗ Burnt or partially burnt paper
- ✗ Corrosive, toxic or flammable material
- ✗ Wood
- ✗ Wallpaper
- ✗ Magnetic tape or photosensitive material (e.g. x-ray film, video tape)

## NO RADIOACTIVE MATERIAL, EXPLOSIVE WEAPONS OR AMMUNITION IS ALLOWED

Yorwaste guarantee to recycle 100% of acceptable material received. The only exception to this will be any material that does not meet our specification. This may be sent to energy from waste and will be charged if it cannot be placed into another more suitable grade.

Downgrade from PP Bag Grade A to Grade B or Grade C or general waste if not to specification. If contamination is more than 5% details to be noted on weighbridge transaction.
